

Practitioner Tips

Reasonable expectations:

- Lifelong yeast
- Autoimmune 20 years
- Complex conditions

Yeast/metals combination- Detox Metals First, Candida binds to metals.

Dental influence, which tooth, biologic dentist referrals, dental – See Dental Charts

Immune triggers must be treated first, (ECR ex., there may be multiple triggers)

Know when to fire clients

Watch for signs not to use system – nervousness of client, legal language of client, computer or program shuts down

Do not over do it - Reconnect, Detox, Products

Use references and checklists to document client file and support findings – thyroid, yeast, protozoa – included in this manual

These checklists offer your client more information and may encourage them to have additional testing by their MD

Don't take on cases you can't handle, refer them out – chiropractic, cranial sacral, acupuncture, etc.

Fix yourself and a few close people first, you won't run out of referrals

Keep common recommendations on hand for better compliance -

- food-based nutrition
- probiotics
- fish oil
- digestive enzymes
- pH strips

Emotional training and clearing suggestions:

- ECR
- Bennett Stellar University – NLP, Hypnosis and Coaching

The intent of this document is to support Nu|Vision users. It is not intended to diagnose, treat, cure or prevent any medical, psychological or nutritional condition, disease or disorder.

Other good courses to take:

ECR

Apex: Body Chemistry, Hormones and Immune Case Studies (must be a licensed practitioner)

Bennett Stellar University – NLP and mind relation to disease

Peaceful Meadow Retreat – Hanna Kroger courses, Access Hanna

Projection of your own issues – be careful. If heavy metals caused your issues, it doesn't mean they are the cause of everyone else's issues. If you were abused as a child, doesn't mean everyone was. I see many practitioners project their knowledge, diet, background that worked for them onto their clients.

Look up everything you don't know, it's the best way to learn and you'll remember after looking the same thing up several times

Emotional diagram examples – Understanding how spiritual and emotional causes influence our physical health:

Example – female client, 45 years old, blood type A

Symptoms are life-long constipation, TMJ since about age 15, anxiety, poor digestion, and commonly experiences feelings of fear for no apparent reason.

Spiritual cause – grandfather shows up

Client admits she was sexually abused by father and grandfather but never told anyone, abuse lasted for about 4 years

To understand, put yourself in place/ state of young girl being sexually abused.

Fear and anxiety are obvious

Other sensation would be “clenching or tightening” which would have to do with symptoms of TMJ and constipation

Poor digestion and anxiety are common with Blood Type A

This person could be “treated” by 50 different practitioners and products without result if original cause of sexual abuse is not cleared

Low pH: minerals, pathogens, oxygen, cardio, blood, degeneration, cancer, aches and pains, kidney stress, brain fog, poor eyesight, poor memory, can't focus, arthritis – there are several great books and references in this manual on importance of pH

Low body temp: metabolism, pathogens, terrain, thyroid, circulation, energy, hair loss (see thyroid checklist)

Work on easy, big symptom stuff first for better compliance

The intent of this document is to support Nu|Vision users. It is not intended to diagnose, treat, cure or prevent any medical, psychological or nutritional condition, disease or disorder.

Work on top 3 client concerns first, may be weight, hair loss, and energy; even if you believe other issues need to be addressed

Don't diagnose, don't use the word treat or cure, use the software as a spiritual device to help facilitate your clients to heal themselves. Don't let your ego get in the way. If someone asks, "can you heal cancer" or "can you fix Parkinson's", your response should be that you don't heal or fix anything. If someone says "you helped my friend Susan get rid of her fibromyalgia, do you think you could get rid of mine", your response should be "Susan did all the work, but I would be happy to work with you too".

Uninformed consent – please do not work on others without consent, this can be determined by dowsing or surrogate muscle testing for pets and children

Patient Education – Keep handouts, videos, books, resource library, printouts from nuvisionusa.com

Practitioner Forms – Have them available to keep clients occupied and to use for client self-diagnoses, found in this manual or at nuvisionusa.com

Resources – Recommended reading and great references:

Help One Another – Hanna Kroeger reference book - Basic anatomy and cross-influence of symptoms, must have!

Excitotoxins, The Taste that Kills by Blaylock – excellent book reference for neurological disorders and influence of MSG and Aspartame to conditions such as Parkinson's, Alzheimers, ADD, ADHD, etc.

Modern Nutritional Diseases by Ottoboni – excellent reference to dietary conditions of Obesity, Type 2 Diabetes, Cardiovascular disease, etc.

Favorite quote – "is a disease a disease if it can be corrected by diet?"

Guide to Better Bowel Care by Jensen, by Bernard Jensen (or any books by Jensen) balloon example, gut affects everything. If you see any gut issues – bacteria, yeast, ulcers, acidity, parasites, IBS, constipation, etc., always correct this area first

Homeopathic Materia Medica and Repertory by Boericke

You Can Heal Your Life, Louise Hay books -

You Can Heal Your Life Companion Book

Drug Induced Nutrient Depletion Handbook by Pelton

Natural Medicines Comprehensive Database (Big black book A-Z reference)

Matrix Energetics by Richard Bartlett – excellent, easy to understand book that ties into informational and instantaneous healing

The intent of this document is to support Nu|Vision users. It is not intended to diagnose, treat, cure or prevent any medical, psychological or nutritional condition, disease or disorder.

Other resources -

www.dictionary.com

www.pubmed.gov

www.fda.gov

www.cancerweb.com

Search engines examples:

“Lipitor side effects”

“Carnitine sources”

“Hashimoto’s symptoms”

“heart teeth bacteria”

Don’t focus on pathogens:

Waste of client’s time and money -

Use zapper or frequencies

Balance pH

Correct the terrain

This will set you apart from other practitioners

The intent of this document is to support Nu|Vision users. It is not intended to diagnose, treat, cure or prevent any medical, psychological or nutritional condition, disease or disorder.
