

## What is EMF

An EMF (which stands for "Electromagnetic Field") is a field of energy created by electrically charged objects. An electromagnetic field has two "components", a magnetic component and an electric component. The electric field is produced by stationary charges, and the magnetic field by moving charges (currents). Electromagnetic fields are also often referred to as "Electromagnetic Radiation" (EMR). You can't see, feel or hear electromagnetic fields, apart from visible light, which is a part of the electromagnetic spectrum

Here are some of the technologies that use or give off EMFs:

- Mains electricity
- Radio
- TV
- Mobile Phones
- Microwave ovens
- Wi-Fi
- X-rays
- Power lines
- Electrical Substations
- House Wiring
- Many standard electrical appliances

## Solutions

Be aware that cell phones and wireless Internet features are not the only sources you need to be cautious of. Essentially, most all electronics will generate EMF's, including the wiring in your home, electric alarm clocks, electric blankets, computers and lamps, just to mention a few.

At minimum, move your bed so that your head is at least 3-6 feet from all electrical outlets. If you are constructing the walls you can put the wires inside pipes, which will virtually eliminate the fields that are generated in the room when the current runs through the wire.

Turn off everything electrical in your sleeping area, including your alarm clock, WI-FI, cell and portable phones.

Try to minimize placing a non-corded phone to your head, and avoid using your cell phone when in a car with a child or pregnant woman. If you absolutely need to use your cell phone, crack your window so the radiation can dissipate quicker.

Put wireless devices on a timer so they turn off at night (and consider offering to buy your neighbors timers for theirs as well).

**Keep Your Cell Phone Away From Your Body When it is On:** The most dangerous place to be, in terms of radiation exposure, is within about six inches of the emitting antenna. You do not want any part of your body within that area.

## Ogonite

In the 1930's and 1940's, Dr. Wilhelm Reich was able to detect and measure the existence of etheric energy (life energy, chi, etc.), which he called orgone. Dr. Reich determined that stacking alternating layers of fiberglass (an organic substance) and steel wool (an inorganic substance) would actually attract and collect orgone/etheric energy of both the life-beneficial positive form (which Reich called "OR" or "POR") and harmful negative etheric energy ("deadly orgone" or "DOR").

**Orgone Accumulator Diagram** He constructed large boxes called orgone accumulators or "oracs" using this simple layering principle and was able to successfully heal his patients of various ailments, including various forms of cancer, by having them sit inside the box for periods of time.

In 1986, scientists at the University of Marburg, Germany published the results of a blind study which showed that 30-minute orgone accumulator treatments caused consistent, positive psycho-physiological effects not seen with the all-fiberglass box used for a control, stating "the results received in our investigation furnish evidence for the assumption that the physical properties of the orgone accumulator and its psychophysiological efficacy on human organisms, postulated by Reich and his associates, factually exist."

When orgonite is within range of a source of DOR/negative energy, it will efficiently and continuously transform it into POR/positive energy as it is being transmitted, which essentially creates positive energy transmitters out of any and all emitters of harmful negative energy, which are totally defenseless against the effect.

The resin in orgonite shrinks during the curing process, permanently squeezing the quartz crystal inside which creates a well-known piezoelectric effect inside the crystal, meaning its end-points become polarized electrically. It is believed this is also what causes the orgonite to function so effectively as a positive energy generator.

Simple.

Works continuously.

Turns negative energy into positive energy.

Purifies the atmosphere, detoxifies water, ends drought.

Helps plants grow better, repel pests & require less water.

Mitigates harmful effects of EMF radiation.

Disarms and repels predatory forms of life.

Inspires a pleasant demeanor and balanced, happier moods.

Frequently remedies insomnia and chronic nightmares.

Helps awaken your innate psychic senses

### **Creating Holographic Orgonite**

With envision Technology, a cutting-edge holographic scanning and informational broadcasting tool we are able to broadcast information 24/7 to each piece of Orgonite. Thus we are able amplify the effects of the orgonite with combining energy and information.
